Correct staging is critical and mandatory, because treatment is directly related to disease stage. The American Joint Committee on Cancer (AJCC), together with the International Union Against Cancer (UICC), sharing a collaborative effort, is the most authoritative international organization in proposing a cancer staging system recognized worldwide. Its paradigm is both used to diagnose cancer and to determine the extent to which cancer has progressed.

This seventh edition of the *AJCC Cancer Staging Handbook*, arriving 7 years after the sixth, updates the old classification system to provide a new organ-specific classification that oncologists and other professionals who

With respect to the previous edition, major revisions have been performed on many issues, including breast, colon, prostate, kidney and others tumours. Furthermore, new chapters have been added or enlarged such as those evaluating bile ducts, cutaneous squamous cell carcinoma, Merkel cell carcinoma, adrenal glands and ophthalmological malignancies.

Without destroying pillars of the TNM system, this edition has to be acquired as a major implementation in respect to the previous one. The reasons are not only related to new information that can eventually modify staging criteria in some areas, but because in this publication data start to become relevant other than the traditional data, based mainly on anatomy and pathology. Thank You Ratings & Reviews1Don't read the reviews from people who haven't even read it yet!One of the worst books I've ever read in my MBBS times. Actually I just read it for the first 3-4 months and it was so irritating that I actually burned it after I passed my first year..!I don't even know what was the point of writing this book. The author has good knowledge about the topic, but like every other Indian author, he just tried to present the content in a way that's easy to mug up. And he didn't care about those few who wished to understand the concepts.
